# SAC™

General Instructions for Sissy Bar Mounted Bags

Attaching sissy bar mounted bags: SAC, Cool SAC, Half SAC, Ultra SAC, Ultra Half SAC and King SAC

1.

2.
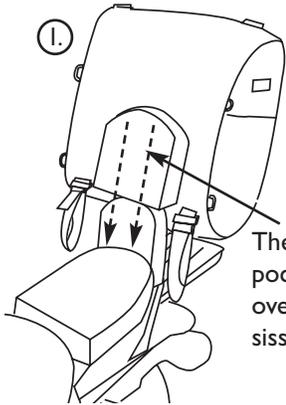

The sissy bar pocket slides over your sissy bar.
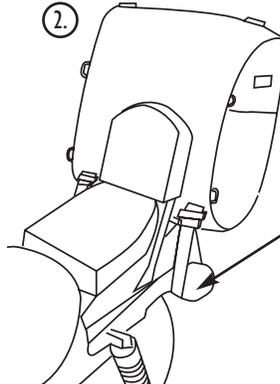

The straps on all SAC™ travel bags will secure around turn signal struts or other safe and secure locations. (shocks, luggage rack, side plates, ect.)

IMPORTANT

Make sure to tuck or tie down any excess strap material so it can't get caught in your wheel spokes while you travel.

Attaching Cool SAC™ to SAC™ when riding with passenger.

1.
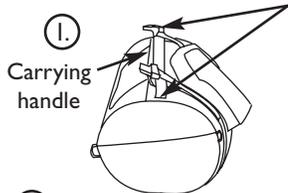

Carrying handle

Run straps under loops on each side of carrying handle on Cool SAC. Pull straps tight so male fork is against loop.

2.
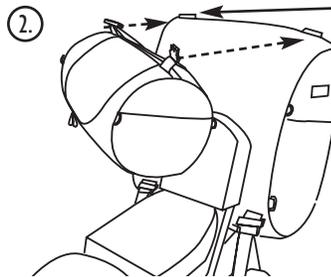

Female clips

Plug male forks on Cool SAC™ into female clips that are tucked underneath loops on the top of The SAC.™
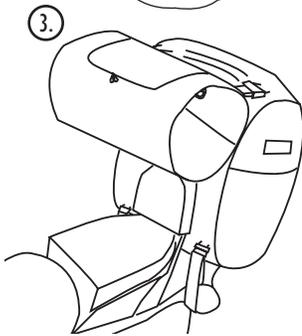

3.

SAC™ and Cool SAC™ look like this when mounted. Cool SAC™ adjusts to provide back rest for passenger. SAC Net™ may be used to further secure Cool SAC™ or other belongings (jackets, helmets, rain gear, ect.)

Attaching Cool SAC™ to SAC™ when riding solo.

1. Mount the SAC™ over your sissy bar so it rests on your luggage rack. Secure the long straps around your turn signal struts.
2. Place the Cool SAC™ on top of the passenger seat (no need to mount it over the sissy bar) and secure straps around the turn signal struts. The Cool SAC™ will act as a great lumbar support.

* These instructions apply to both the SAC and Cool SAC Package™ and Half SAC Package.™
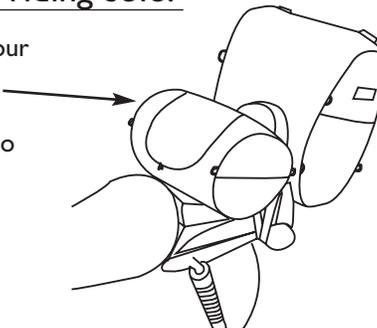

We want SAC™ and Cool SAC™ to be a useful and enjoyable addition to your bike. If anything should go wrong with The SAC™ or Cool SAC™, send it back to us and we will fix it or send you a new one. We appreciate your support and your comments are welcomed.
