

SACTM WRAPPER

Instructions

The SAC Wrapper is designed to be used as a rain cover over a properly installed SAC, SAC & Cool SAC Package or SAC & Half SAC Package. The Wrapper should never be used alone and should never be used for anything but its intended use. There are two sizes of SAC Wrappers. The Regular Size fits on the SAC only. The large size mounts over a SAC & Cool SAC Package or a SAC & Half SAC Package. SAC Wrappers also help to stabilize your load.

Installing the Wrapper.

1. Place SAC Wrapper directly over your properly installed SAC product with label facing out (away from backrest).
2. Pull bottom cord snug and tie off. Make sure cord is snug because this seals bottom opening from backsplash from rear fender.
3. Pull two top and four side cinch straps snug to compact your load. Do not over tighten cinch straps.
4. At your discretion, apply SAC reflective patch or other reflective material to make your SAC Wrapper visible in bad weather or night riding.
5. If you have any questions, do not hesitate to call US at 1-800-445-8946.
